

The Society „Voices for Africa“

Is a non-profit organisation based in Heidelberg, Germany. The society was founded by the African music choir „Mokosané – Voices for Africa“. Our projects are financed with concert tickets and charity donations both small and large.

Every Euro counts!

We need many donors to continuously finance school, food and education. Every Euro goes to Africa. We all work voluntarily. We would like to expand the project: financial credit for women and metal work training for orphans would help to fight poverty in the village.

Please support us!

We are always happy to receive any donations, whether small or large and especially over standing orders.

15 Euros make all the difference!

Become a Godmother or Godfather to the orphaned children in Estijeni and neighbouring villages. It costs just 15 Euros per month to feed and send one child to school.

Charity Account

Sparkasse Rhein-Neckar-Nord

AFRICA

The Land of Orphans

The Kingdom of Swaziland in southern Africa is a very poor country and has the highest incidence of Aids in the world with 40% of the population infected. Most of the fatalities are parents. Their children usually survive them, the number already rising to 70,000 from a national population of one million. And there are no orphanages! Many children no longer have any relatives at all and live with their siblings in the complete absence of adults.

Our project in the village of Esitjeni

Estijeni has 240 school aged orphans. Many now live with their Grandmothers who are completely without financial means. They are unable to afford the expensive school fees or to feed the little ones. „Voices for Africa“ pays both schooling and clothing for the children. Only with an **education** will these children have a future.

Many children in the village are permanently hungry. 250 needy children currently receive a hot midday meal, also at weekends and during holidays. And we employ two cooks to prepare the great pots of food.

Inkhosikati LaMtsetfwa – the chief of Esitjeni - is backing the project

The Education Centre

We built the Education Centre with the support of the Baden-Württemberg State Trust and it was officially opened with a ceremony and great festivity during the choir's second visit in march 2008. Beginning in May 2008, thirty girls and boys are to receive training in sewing and now also in computer.

We support University Students and tertiary Education

If students have finished Highschool we try to support their tertiary education. It is very expensive. Some of them are able to go to University. They study teaching, design, electrical engineering, global health or economics, like Zinhle D. That is her Graduation Foto.

Zodwa Dlamini – our Project Manageress

The success of this type of project stands or falls dependant on the competence and reliability of an on the spot partner. It's especially the women in Africa that fulfil this role. In Zodwa, we have found an assertive manageress with enormous organisational talent and a big heart for the children of the village. Whether negotiating, motivating or winning new sponsors, Zodwa is tireless in her endeavours. She maintains regular e-mail contact with us.

The children celebrate the opening of the Education Centre
